

# Alfredo Rosadilla

## Senior Web Developer

Hi there! I'm a passionate frontend developer with over a year of experience at Aurelia Solutions and 5+ years at Globant, working with top-notch clients like Oort, LATAM, and Quantcast. I excel in React, React Native, and Micro FrontEnds, and have successfully led and mentored developer teams. My greatest achievements include enhancing user experiences on high-traffic websites and utilizing the latest technologies to deliver outstanding results for my clients! Let's make web magic together!

### Employment History

#### Senior web developer at AURELIA SOLUTIONS, Santiago de Chile

MARCH 2022 – PRESENT

Aurelia Solutions is a software company with a main base in the USA that specializes in providing top-quality web development solutions. Our team of highly qualified professionals has extensive experience in this field and is committed to delivering the best possible service to our clients.

One of our main clients is Oort, a startup in the cybersecurity field. We have worked with Oort for over a year, providing web development services using technologies such as React JS, GraphQL, and Styled Components for their main tool called Centenario. We are proud to have played a role in the success of Oort and are committed to continuing to offer our expertise and support as they grow.

In addition to our work with Oort, we also offer a wide range of web development services to other clients. Our goal is to help all of our clients succeed by providing them with top-quality solutions and the latest technologies.

#### LATAM - XP / Team leader - Software Designer (Sr 2) at Globant, Santiago de Chile

MARCH 2021 – MARCH 2022

As a Software Designer (Sr 2) and team leader with strong experience in React, React Native, and Micro FrontEnds, as well as a working knowledge of Spring Boot and microservices architecture, I had the opportunity to work with LATAM to improve the user experience on their primary website, where thousands of tickets are sold daily.

During my time working with LATAM, I utilized my extensive knowledge of JavaScript ES5/6/7, Jazmin, Enzyme, C4, and Plantuml, among other tools, to deliver top-quality solutions that helped the company achieve its goals. As a leader, I was responsible for mentoring and guiding a team of developers, ensuring that

they had the resources and support they needed to succeed. I also worked closely with cross-functional teams and clients to define and implement software design solutions, utilizing agile methodologies to manage projects, track progress, and continuously improve processes.

LATAM is an airline with a rich history dating back to 1929 and a reputation for pioneering, overcoming challenges, and achieving success. I am proud to have had the opportunity to work with such a well-respected company and contribute to their ongoing growth and development. You can learn more about their history on their official website at <https://www.latam.com/> or in Spanish at [https://www.latam.com/es\\_cl/conocenos/historia/](https://www.latam.com/es_cl/conocenos/historia/).

### **LATAM - XP / Team leader - Senior Web UI developer at Globant, Santiago de Chile**

DECEMBER 2019 – MARCH 2021

As a Senior Web UI Developer and team leader with strong experience in React, React Native, and Micro FrontEnds, as well as a working knowledge of Spring Boot and microservices architecture, I had the opportunity to work with LATAM to improve the user experience on their primary website, where thousands of tickets are sold daily.

During my time working with LATAM, I utilized my extensive knowledge of JavaScript ES5/6/7, Jazmin, Enzyme, C4, and Plantuml, among other tools, to deliver top-quality solutions that helped the company achieve its goals. As a leader, I was responsible for mentoring and guiding a team of developers, ensuring that they had the resources and support they needed to succeed. ### **Quantcast - Share Services / Team Leader - Web UI developer at Globant, Montevideo**

NOVEMBER 2018 – DECEMBER 2019

As a Senior Web UI Developer with expertise in React, Redux, and other front-end technologies, I had the opportunity to work with Quantcast, a leading company in the field of big data analysis for the advertising industry. Based in San Francisco and founded in 2006, Quantcast provides their clients with a tool called Measure, which offers a more in-depth level of detail about audience data compared to similar tools like Google Analytics. This allows clients to create targeted advertisements that have a higher value for the end consumer.

During my time with Quantcast, I traveled to their headquarters in San Francisco on three occasions to participate in discovery processes and validate application architectures. My final visit was focused on planning the projects the team would tackle in the fourth quarter. As the technical leader for this project, I was responsible for mentoring processes and making decisions related to account and team growth within Globant.

Through the efforts of the entire team, we were able to exceed Quantcast's annual growth metrics and take on new responsibilities and projects within the account. I also gained valuable experience as a Scrum Master during this project, using my

expanding my knowledge of the startup ecosystem. I am passionate about web development, and I'm often engaged in various projects that focus on entrepreneurship and innovation. I take great pleasure in expressing myself through writing, and I'm proud to have a published book to my name. Beyond my professional interests, I have a love for dancing, particularly salsa and bachata, which allows me to express myself creatively and stay active. I maintain a healthy lifestyle through rollerblading and cherish the company of my two beloved cats, Milo and Teo. Travel is an essential part of my life, providing me with invaluable experiences and insights, as well as the opportunity to embrace different cultures and perspectives. And, of course, who doesn't love traveling, right? Haha!

knowledge to help the team refine and better manage our ceremonies, drastically reducing meeting times while improving their quality.

In addition to my background in React and Redux, I have some experience in Pseudocode, Java, the Play Framework, the Spring Boot Framework, PostgreSQL, and AWS (Dynamodb), primarily in relation to leadership tasks. I am proud of the work we did as a team at Quantcast and the contributions we made to the company. I am confident in my ability to lead and mentor developers, as well as work closely with cross-functional teams and clients to define and implement software design solutions using agile methodologies. I am always looking for new opportunities to use my skills and experience to make a positive impact on a team and organization.

### **Quantcast - Choice 2 / Web UI developer - React expert at Globant, Montevideo**

**AUGUST 2018 – NOVEMBER 2018**

Official website - <https://www.quantcast.com/>

I had the opportunity to work with Quantcast, a U.S based company founded in 2006 and headquartered in San Francisco. Quantcast is dedicated to big data analysis in the advertising world and provides their clients with a tool called Measure, which works similarly to Google Analytics but provides a more in-depth level of detail about audience data, allowing clients to generate advertisements that are geared towards specific audiences.

On my first trip to the San Francisco offices, I worked together with a Colombian partner to undertake the discovery process for the Privacy project and establish a relationship of trust with the client. As one of the first two subcontracted developers on the initial team, we achieved an incredible performance and were able to grow rapidly, increasing the number of developer positions and responsibilities assigned to the team. In just four months, a new team was created through a mitosis process and I was trusted enough to become its technical leader.

The Privacy project was developed around the GDPR regulation put forth by the IAB. This regulation directly affects Quantcast's business model as it regulates data collection transparency and sets standards for protecting the information acquired from end users.

### **Deluxe - IdentifEye - Web UI developer / Angular expert at Globant, Montevideo**

**JANUARY 2018 – AUGUST 2018**

As a skilled frontend developer, I had the opportunity to work on an exciting project with Deluxe, a company known for their high code quality and user interface standards. The project presented a challenge that allowed me to further improve my skills and included the use of technologies such as Angular 2-6, OAuth 2.0, JavaScript ES5/6, jazmin, and enzyme.

Deluxe is a leading player in the content creation industry, with over a century of experience in the market. I was fortunate to be a part of their team and contribute to the development of IdentifEYE, a innovative project aimed at helping clients manage copyright issues on the web. The clients for this product are major technology companies at the forefront of their industry. The product itself was built using Angular 5 on the client-side and featured an interface designed with Angular Material 2. It was a rewarding experience to be able to work on such a impactful project with a reputable company like Deluxe.

### **Grey - Grey Collaboration Team / Web UI developer - Angular expert at Globant, Montevideo**

NOVEMBER 2017 – JANUARY 2018

Official website - <http://grey.com/global>

As a developer working with Grey, I was faced with the challenge of working with a wide range of technologies, including Angular JS 1.2/1.5, Angular 2.0, JavaScript ES5/6, Wordpress, and BackBone. While this provided a unique opportunity to broaden my skillset, the use of obsolete technologies ultimately hindered my growth as a developer and led me to seek out other opportunities.

Despite this, my time with Grey allowed me to focus on the business side of the project and develop my skills in project management. Grey is a globally recognized advertising agency, with offices in over 83 countries and a reputation for producing top-quality creative work. It was a valuable learning experience and I am grateful for the opportunity to have worked with such a reputable company.

### **TNS - TNS Biz Solution Dev Team / Web UI developer - Angular expert at Globant, Montevideo**

MAY 2017 – OCTOBER 2017

Official website - <http://www.tnsglobal.com/>

As a UI expert on the TNS project, I had the opportunity to work with a fantastic team and establish a great relationship with the client. They trusted me to deliver a high-quality product, which gave me the freedom to implement my work as I saw fit.

My initial task was to reorganize the project structure and migrate from .NET MVC with Razor and Angular JS 1.2 (SSR) to a single-page application (SPA) with Angular JS 1.5.3. Using tools like Browserfly, I focused on enabling the use of ES6 and ES7, updating dependencies, and transforming the site into an SPA. The refactoring had to be seamless, so both versions could coexist during a staged migration. Once that was complete, we began exploring a third migration to Typescript and Angular 2.

Throughout this process, I worked with a range of technologies, including Angular JS 1.2/1.5.3, Angular 2, JavaScript ES5/6, Typescript, Browserify, and karma. TNS is one of the largest investigation agencies globally and is a part of Kantar, a leading consulting, information, and knowledge company. This project was one of my best experiences at Globant in terms of interpersonal relationships, and I still keep in touch with my former teammates to this day. They are a warm and talented group of individuals with a strong background in backend development.

### **United Airlines / Web UI developer - Angular expert - Team Leader trainee at Globant, Montevideo**

OCTOBER 2016 – MAY 2017

Official website - <https://www.united.com>

This was my first project at Globant and it was a great learning opportunity that allowed me to work with many talented people within the company. Many of them supported me and encouraged me to grow in my career path at Globant. I started as a Web UI developer and eventually became the team's technical leader, with the support of my mentor. I learned a lot about not only technologies, but also about personnel management and agile methodologies. Overall, this project was one of the best experiences in my career.

Technologies used: Angular JS 1.5, JavaScript ES5/6, Gulp, karma, etc...

UNITED is a major American airline with a long history of innovation in the aviation industry. You can learn more about their history at the following link: <http://view.ceros.com/united/innovation-firsts-in-the-aviation-industry/p/1>

## **Web UI developer / Angular expert at Altimetrik, Montevideo**

NOVEMBER 2015 – OCTOBER 2016

Official website - <https://www.altimetrik.com>

I had the opportunity to work with Altimetrik, a company founded in 2012 with a vision to create a global presence that embodies digital and technological transformation through a continuous investment in talent, platforms, and skills. This project was the first large company I worked with and I learned a lot about SCRUM and trained in Angular and Javascript lower level programming.

I was fortunate to have one of the best mentors in my career who gave me a lot of time to train and improve myself. I spent many days reading books to learn about Javascript and expand my theoretical knowledge base. I particularly focused on the You Don't Know JS series, which helped me to deepen my understanding of functional development and learn about patterns and architectures.

## **Full Stack Developer at TalleresPossa., Montevideo**

FEBRUARY 2015 – MARCH 2016

As a freelancer, my first significant client was Talleres Possa, a small Uruguayan business that specializes in mechanical elevator maintenance. The company approached me with the goal of creating a personalized solution for managing internal communication with their clients and the ability to synchronize their data with their clients' in order to improve this communication.

To develop this solution, I utilized technologies such as Angular JS 1.5.3, JavaScript ES5, HTML5, SCSS, Node JS, and ExpressJS, as well as MySQL. This project allowed me to hone my skills in these technologies and deliver a successful solution to the client. It was a great learning opportunity and helped me to establish myself as a reliable freelancer in the industry.

## **Web UI Junior Developer at Sophilabs, Montevideo**

JULY 2015 – NOVEMBER 2015

Official website - <https://sophilabs.co>

This was my first job as a web developer, and it was a great learning opportunity. Working at Sophilabs allowed me to get my feet wet in the world of web development and sparked my passion for the field.

I was fortunate to have fantastic mentors who supported me and helped me grow in my career. I spent a lot of time learning and improving my skills, reading books and diving into technologies like Angular JS, JavaScript, HTML, and CSS.

Overall, it was a fantastic experience that set the foundation for my career in web development.

Technologies: Angular JS 1.5.3, JavaScript ES5, HTML, CSS3, etc...

Sophilabs is a small business dedicated to developing software for a variety of industries, including social networks, finance, identity and authentication, education, and M2M.

## **Education**
